Education

PhD, Biostatistics **2024 – Present**
University of California, Los Angeles Los Angeles, CA
Advisor: Dr. Falco J. Bargagli-Stoffi

ScM, Biostatistics **2024**
Johns Hopkins University Baltimore, MD
Advisor: Dr. Ni Zhao
Thesis: Overview of Statistical Methods for T-Cell Receptor Sequencing Analysis

BS, Applied Mathematics and Statistics; Public Health Studies **2022**
Johns Hopkins University Baltimore, MD
Minor: Psychological and Brain Sciences

Research

Graduate Student Researcher **June 2025 – Present**
University of California, Los Angeles Los Angeles, CA
Supervisor: Dr. Falco J. Bargagli-Stoffi

- Develop and assess causal inference frameworks for quantifying treatment effect heterogeneity, using simulation studies and applied analyses to evaluate subgroup identification and individualized treatment strategies
- Investigate the comparative performance of high-benefit and high-risk causal modeling approaches for precision medicine, focusing on estimation accuracy, clinical interpretability, and implications for treatment decision-making

Graduate Research Assistant **January 2023 – October 2024**
Johns Hopkins University Baltimore, MD
Supervisor: Dr. Ni Zhao

- Benchmarked and summarized T-cell receptor analysis tools; evaluated diversity, single-cell analysis, visualizations, compatibility, and runtime
- Analyzed longitudinal associations between autoantibodies, diabetes medication, and C-peptide measurements using longitudinal and survival models, and developed an R Shiny app to dynamically predict biomarker trajectories and cardiovascular outcomes.

Big Data Summer Institute Summer Research Intern **June 2021 – August 2021**
University of Michigan Ann Arbor, MI

- Conducted an NIH-funded project with Dr. Xiaoquan Wen; assessed GWAS replicability across ethnic groups using various meta-analysis methods
- Analyzed vaccine sentiment on Twitter using sentiment analysis and Monocle3 toolkit under Dr. Johann Gagnon-Bartsch as part of the Big Data Summer Institute

Bruins-in-Genomics Program Summer Research Intern **June 2020 – August 2020**
University of California, Los Angeles Los Angeles, CA
Supervisor: Dr. Jae Hoon Sul

- Analyzed whole-genome sequencing by implementing Bayesian framework to identify risk factor genes for congenital heart disease

Research Intern **May 2019 – May 2020**
Johns Hopkins University Baltimore, MD
Supervisor: Dr. Ryan Vandrey

- Supported marijuana behavioral pharmacology trials, including data entry and participant recruitment

Industry Experience

Statistics PhD Intern **June 2026 – August 2026**
AbbVie North Chicago, IL
Supervisor: Jia Jia

- Conducted a benchmarking study comparing the performance of statistical methods, such as mixed models for repeated measures (MMRM), linear mixed models (LMMs), and robust regression, for the analysis of ordinal and non-normally distributed outcomes.
- Evaluated model performance using simulated data and AbbVie neuroscience clinical trial data.

Graduate Research Intern **April 2025 – June 2026**
Amgen Inc. Thousand Oaks, CA
Supervisor: Matt Austin

- Develop a statistical scoring framework to evaluate clinical site performance by summarizing query frequency and resolution time for each site, helping study teams identify underperforming sites and prioritize follow-up
- Implement and compare advanced count-duration models (negative binomial, hurdle-lognormal, bivariate hurdle-lognormal) to model query counts and resolution times in support of site ranking and performance monitoring

Research Intern **October 2020 – July 2023**
CHADIS, Inc. Baltimore, MD
Supervisor: Dawn Lewis

- Outlined and prepared adolescent-health questionnaires for the telehealth web-based platform CHADIS (Comprehensive Health and Decision Information System)

Teaching

Teaching Assistant
Department of Biostatistics, University of California, Los Angeles Los Angeles, CA

- BIOSTAT M235: Casual Inference Spring 2026
- BIOSTAT 100: Introduction to Biostatistics Spring 2025
- BIOSTAT 201B: Introduction to Biostatistics Winter 2025
- BIOSTAT 201A: Introduction to Biostatistics Fall 2024

Teaching Assistant
Department of Biostatistics, Johns Hopkins University Baltimore, MD

- PH.140.623/PH.140.624: Statistical Methods in Public Health III/IV Spring 2024
- AS.280.345: Public Health Biostatistics Fall 2023

Awards

Graduate Research Mentorship Award **2026**
UCLA Division of Graduate Education
Research Award ($30,000)

Honorable Mention, Graduate Research Fellowship Program (GRFP) **2024**
National Science Foundation

Community Service and Leadership

Biostatistics Student Association

Department of Biostatistics, University of California, Los Angeles — Los Angeles, CA

Professional Development Coordinator — Sept 2026 – Present

Plan and coordinate professional development events, including "Lunch & Learn" events, for biostatistics graduate students, handling speaker outreach and event logistics.

Vice President — Sept 2025 – June 2026

Co-led weekly executive board meetings and helped coordinate student organization initiatives, including planning and organizing the annual Alumni Mixer.

Led the department's graduate mentorship program, coordinating mentor-mentee matching and quarterly check-ins to support students' academic and career development.
